DETAILED ACTION

Allowable Subject Matter

Claims 1-8 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Marchok et al., US Patent No. US 6122246 A discloses an apparatus and method for clock synchronization in a multi-point OFDM/DMT digital communications system. Marchok does not teach or fairly suggest the following features, which are recited in the independent claims 1 and 3 of the present application:

A method of interlocking FFT window position recovery with sampling clock control in symbol units in an orthogonal frequency division multiplexing (OFDM) receiver for receiving an OFDM symbol consisting of a useful data interval and a guard interval, the method comprising the steps of:

(a) extracting a pilot signal from fast fourier-transfonned OFDM received signals, and detecting inter-pilot phase differences,

(b) averaging phase differences detected in step (a) for a symbol to generate a mean phase difference value and normalizing the mean phase difference by dividing the mean phase difference value into reference values corresponding to phase differences generated when FTT window errors of at least one sample exist, thereby to generate a normalized value as recited in claims 1 and 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
